

Item 5: Future Work Programme: Consultation Processes and Related Policy Initiatives

Introduction

1. The table overleaf seeks to summarise recent, current and future consultations of potential interest to SASIG members in an easy to follow format. Comments are welcome and an updated version will be circulated with the minutes, which takes these on board.
2. Suggestions for other information that might be added to the table are also invited.
3. A column identifies those Inquiries and consultations SASIG has responded to, and those it is proposed it should.

Recommendations

- **That SASIG notes the contents of the new table and offers views on other events that should be included or how this table can be improved.**
- **The Secretariat to issue an updated table with the minutes of this meeting.**

SASIG Meeting: 16th November 2017
